V-CARD 

# Are administrative procedures time-consuming, cost-intensive and “yesterday’s news”? – With our advice, it doesn’t have to be.

Public authorities often tick differently to private companies – be it in terms of language, mindset or decision-making processes. We understand both sides and act as a reliable mediator. With our know-how, we design procedures efficiently and find the path to project success.

Dear Sebastian, what does our promise “To make it simple, but significant” mean to you?

“For me, ‘make it simple, but significant’ means working through a 100-page administrative procedure file, understanding the essence of the matter and presenting our client with the result and possible solutions tailored to her specific objectives on one A4 page.”

# There are many ways to realize large-scale projects – together we will find the one that suits you best.

The spectrum of public commercial law is broad and the requirements for companies are diverse. We provide our clients with tailor-made solutions across all sectors that focus on the essentials.

## **Environmental and planning law**

Supervision of major industrial projects (e.g. linear energy transition projects) and resolution of all related environmental law issues.

## **Approval of industrial plants**

We help with the realization of all approval procedures and enable competent authorities to approve projects with legal certainty.

## **Mining law**

Targeted advice on the implementation of all mining projects, including support for public participation and environmental impact assessments.

## **Constitutional and administrative law**

We accompany our clients with confidence through all phases of administrative proceedings right through to consistent representation in court.
